

Dear all,

I am writing to express my concern about the current upward trend in the use of electrically assisted pedal cycles (EAPCs) and electric bikes in Merseyside.

To address this, Merseyside Police has launched **Operation Gears**, a targeted campaign to tackle serious organised crime, robbery and ASB linked to the illegal use of two-wheeled vehicles, including electric motorcycles, scooters and non-compliant e-bikes.

As with all major cities, Liverpool is experiencing a boom in electric bikes and electrically assisted pedal cycles (EAPCs). Whilst this is seen by many as an alternative to public transport and the increased cost of vehicles, this has undoubtedly presented a problem whereby electric bikes / EAPCs are reported as a dominant form of transport, many do not understand the legalities in relation to these bikes and alongside the education, there will be those who inherently utilise these for criminality and target vulnerable users.

Merseyside Police are committed to tackling the increased threat and risk posed by EAPCs and electric bikes but in doing so, education is needed for those using them.

A large portion of riders are young people, sometimes illegally dependent on their age and the absence of a substantial driver's licence. More importantly, they are leaving themselves vulnerable to being targeted for the bikes which are seen as a high-value item. There have been many reports of various crime that are cross-cut with electric bikes being involved and we do not want any of our Merseyside young people to become a victim of any crime.

We believe there is a need to develop a better understanding of laws and regulations that govern the use of these EAPCs and electric bikes despite

numerous social media and news reports. This letter intends to seek your support to educate your students and parents through your assemblies, newsletters, and online platforms.

This is in the hope that with this education; firstly, the roads become safer for both adults and especially children, but also pedestrians, as we recognise some who ride electric bikes, do so on pavements, endangering the safety of others and secondly; to reduce the number of victims associated with EAPCs / electric bikes including road traffic accidents, theft, and robbery, which have an added impact on both our NHS and Mersey Fire and rescue service. The safety also extends not just when riding the bike but storage of bikes as some batteries can become unstable which has sadly caused house fires, some fatal.

### Identifying an illegal

## ELECTRICALLY ASSISTED PEDAL CYCLES (EAPCs)

Electric motor mounted to the front or rear wheel (or under the pedals) to provide electric drive without pedalling

Twist and go throttle and accelerator

Battery mounted to the frame with zip ties or other methods

You can ride an electric bike if you're 14 or over, as long as it meets certain requirements. These electric bikes are known as 'electrically assisted pedal cycles' (EAPCs).

MERSEYSIDE  
**POLICE**

OPERATION  
**GEARS**

You do not need a licence to ride one and it does not need to be registered, taxed or insured.

What counts as an EAPC?

[EAPC standards and legal requirements - GOV.UK](#)

An EAPC must have pedals that can be used to propel it.

It must show either:

- The power output
- The manufacturer of the motor
- The battery's voltage
- The maximum speed of the bike

It's electric motor:

- Must have a maximum power output of 250 watts
- Should not be able to propel the bike when it's travelling more than 15.5mph
- 

Where you can ride?

- If a bike meets the EAPC requirements, it's classed as a normal pedal bike. This means you can ride it
- On cycle paths and anywhere else pedal bikes are allowed.

Any electric bike that does not meet the EAPC rules is classed as a motorcycle or moped and needs to be registered and taxed.

You'll need a driving licence to ride one and you must wear a crash helmet.

## Identifying an illegal

# OFF-ROAD ELECTRIC MOTORCYCLE

**SOLD FOR OFF-ROAD USE ONLY  
(PRIVATE LAND ONLY IF THE RIDER HAS PERMISSION)**

This is an electric motorcycle.

Some of the most well-known manufacturers of off-road electric motorcycles would include SUR-RON, Talaria, Bultaco, Stealth etc.

They are not street-legal.

They are only street-legal with a valid number plate, registered with the DVLA, taxed and MOT'd.

You may hear these motorcycles also referred to as 'scrambler bikes'.

## Identifying an illegal **POWERED SCOOTERS**

External company VOI (you may spot them as the red scooters around Merseyside) are the only road-legal versions of the powered scooters.

- All powered scooters are classified as Personal Light Electric Vehicles (PLEVs)
- The only place privately owned scooters can be used is on private land (with the landowners' permission)
- If used on the road or in a public place, they are treated as motor vehicles

OPERATION  
**GEARS**

We will continue to tackle the issue from a policing perspective but work closely alongside partner agencies as we recognise that we need assistance beyond the police to tackle this upward trend. I am sure you are in agreement to ensure the safety of the students is paramount and with that, I hope that with this bit of education, we can make students and parents make better choices and enable the safety of themselves and others.

# TOP TIPS TO PROTECT YOUR BIKE

## **M** Mark your bike

Attend a free bike marking event advertised by Merseyside Police. These are advertised on the local Merseyside Police social media channels. Your make is 83% less likely to be stolen if it is both marked and registered.

## **A** Awareness

When you are out on your bike be aware of your surroundings and don't let thieves try to steal it. When out on the street leave your bike in a well lit area where it can be seen by passers by. Lock both wheels and the frame to a cycle stand, or an immovable object. Make sure the lock goes through the frame, wheel and the post you are securing it to. Take any removable items with you.

## **R** Register your bike

Register your bike for free by visiting The National Cycle Crime Database/BikeRegister. Merseyside Police are now actively checking bikes on the National Cycle Database. If your bike is stolen, this will significantly increase the chances of you getting your bike back. Scan the QR code (to the right) to register your bike on BikeRegister.

SCAN ME

## **K** Keep out of view

When at home store your bike in a shed or garage. Don't leave the bike unattended outside the front of your house. Remember to secure it to an immovable object.

## **I** Insure

If you have invested a significant amount of money into your bike, consider specialist bike insurance or check your home insurance covers you for theft away from home.

## **T** Top bike lock

A decent bike lock is worth its weight in gold. A heavy-duty bike lock can make thieves jobs more difficult, often meaning they want to steal a bike that is less secure. Make sure you buy a Sold Secure Diamond or Gold Lock.
